Inventory & MSI

The total inventory of properties available for sale as of August 2022 was 62, a difference of -10% from last month, and -2% from 63 in August 2021, and was at its lowest level compared to 2021 and 2020. Market Time

The average days on market (DOM) shows the number of days the average property is on the market before selling. An upward trend tends to indicate a move towards a buyer's market, while a downward trend tends to indicate a move to a seller's market. The DOM for August 2022 was 31, a change of -11% from 35 days last month, and 63% from 19 days in August 2021, and was at its lowest level compared to 2021 and 2020.

Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

Selling Price vs. Listing Price

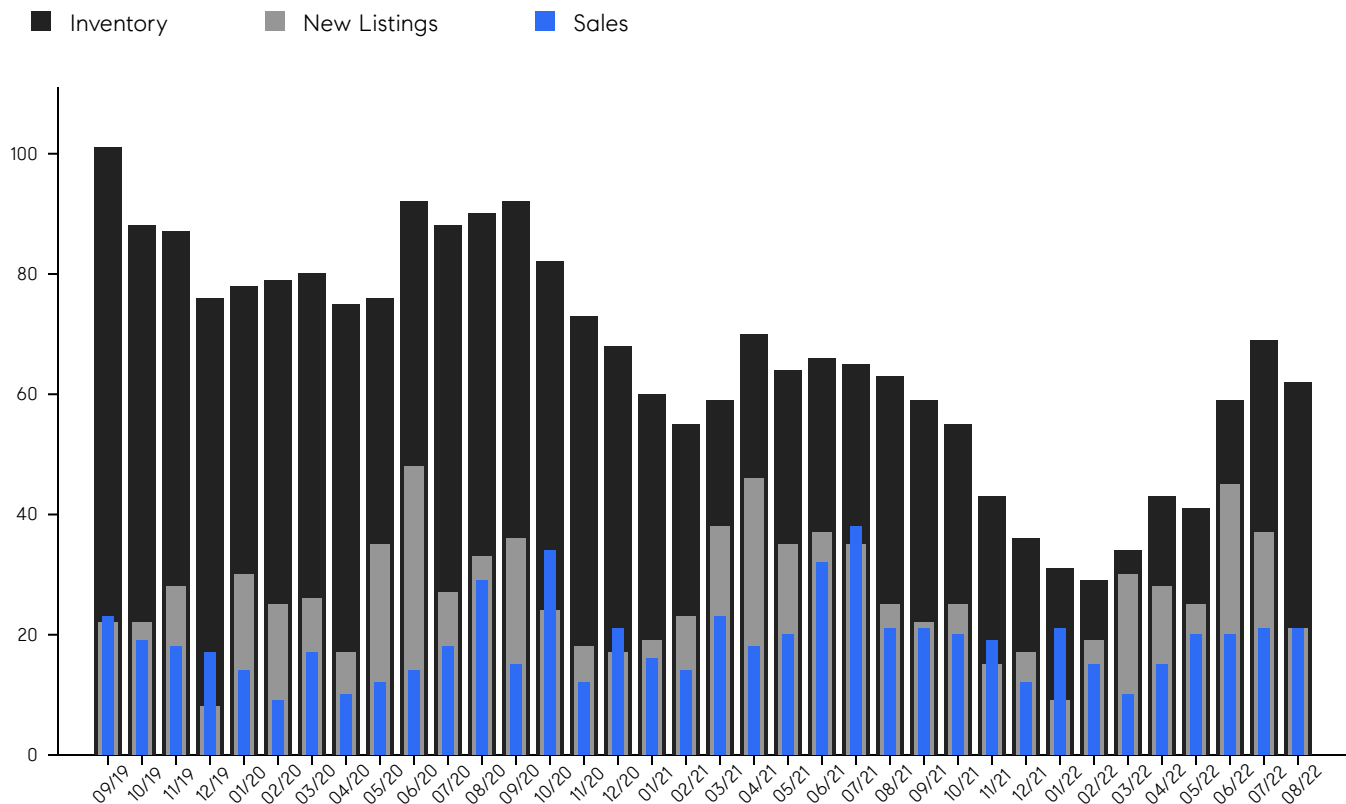

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The August 2022 selling price vs. listing price ratio was 100.4%, compared to 101.8% last month, and 102.8% in August 2021.
