Inventory & MSI

The total inventory of properties available for sale as of September 2022 was 62, a difference of 11% from last month, and 5% from 59 in September 2021, and was at mid level compared to 2021 and 2020. The months of supply inventory (MSI) was at 2.7 months, a similar level compared to 2021 and 2020. A comparatively lower MSI benefits sellers, while a higher MSI benefits buyers.

Market Time

The average days on market (DOM) shows the number of days the average property is on the market before selling. An upward trend tends to indicate a move towards a buyer's market, while a downward trend tends to indicate a move to a seller's market. The DOM for September 2022 was 35, a change of -10% from 39 days last month, and 17% from 30 days in September 2021, and was at its lowest level compared to 2021 and 2020.

Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

Selling Price vs. Listing Price

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The September 2022 selling price vs. listing price ratio was 101.3%, compared to 100.3% last month, and 99.6% in September 2021.

Inventory, New Listings & Sales

This last view of the market combines monthly inventory of properties for sale along with new listings and sales. The graph shows the basic annual seasonality of the market, as well as the relationship between these items. The number of new listings in September 2022 was 26, a change of 37% from 19 last month and 18% from 22 in September 2021.
