JANUARY 2025

Inventory & MSI

The total inventory of properties available for sale as of January 2025 was 36, a difference of 6% from - last month, and 57% from 23 in January 2024, and was at mid level compared to 2024 and 2023. The months of supply inventory (MSI) was at 5.1 months, a similar level compared to 2024 and 2023. A comparatively lower MSI benefits sellers, while a higher MSI benefits buyers.

Market Time

The average days on market (DOM) shows the number of days the average property is on the market before selling. An upward trend tends to indicate a move towards a buyer's market, while a downward trend tends to indicate a move to a seller's market. The DOM for January 2025 was 45, a change of 15% from 39 days last month, and -47% from 85 days in January 2024, and was at its lowest level compared to 2024 and 2023.

Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

Selling Price vs. Listing Price

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The January 2025 selling price vs. listing price ratio was 99.2%, compared to 96.8% last month, and 95.6% in January 2024.
