Inventory & MSI

The total inventory of properties available for sale as of July 2025 was 14, a difference of 27% from - last month, and 8% from 13 in July 2024, and was at its highest level compared to 2024 and 2023. Market Time

The average days on market (DOM) shows the number of days the average property is on the market before selling. An upward trend tends to indicate a move towards a buyer's market, while a downward trend tends to indicate a move to a seller's market. The DOM for July 2025 was 20, a change of -20% from 25 days last month, and -13% from 23 days in July 2024, and was at its lowest level compared to 2024 and 2023.

JULY 2025

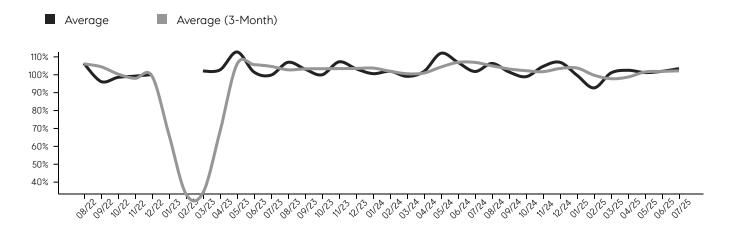

Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

Selling Price vs. Listing Price

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The July 2025 selling price vs. listing price ratio was 103.5%, compared to 101.9% last month, and 101.8% in July 2024.
