Inventory & MSI

The total inventory of properties available for sale as of March 2023 was 59, a difference of 11% from last month, and 40% from 42 in March 2022, and was at mid level compared to 2022 and 2021. Market Time

The average days on market (DOM) shows the number of days the average property is on the market before selling. An upward trend tends to indicate a move towards a buyer's market, while a downward trend tends to indicate a move to a seller's market. The DOM for March 2023 was 43, a change of 139% from 18 days last month, and 34% from 32 days in March 2022, and was at its lowest level compared to 2022 and 2021.

MARCH 2023

Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

Selling Price vs. Listing Price

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The March 2023 selling price vs. listing price ratio was 101.3%, compared to 102.6% last month, and 104.2% in March 2022.
