Selling Price Per Square Foot

The selling price per square foot (PPSF) is a great indicator for the direction of property values. Since median & average sales prices can be impacted by the "mix" of high or low end properties in the market, the selling price per square foot is a more normalized indicator on the direction of property values.

Selling Price vs. Listing Price

The selling price vs. listing price reveals the average amount that sellers are agreeing to come down from their list price. The lower the ratio is below 100%, the more of a buyer's market exists, while a ratio at or above 100% indicates more of a seller's market. The November 2025 selling price vs. listing price ratio was 103.7%, compared to 101.4% last month, and 104.0% in November 2024.
